

A blue classic car is parked in the foreground on the left. In the background, a blurred car is moving through a parking garage, creating light trails. A yellow barrier is visible in the distance. The scene is lit with bright overhead lights.

Arivo

**DIGITAL
PARKING SYSTEM**

SIMPLE.MODERN.PROFITABLE.

STATE OF THE ART TECHNOLOGY – MAINTENANCE-FREE AND SIMPLE TO USE

Arivo offers everything from a single source, from the simple parking solution with the industry's best license plate recognition rate to the complete intelligent rental platform. The web-based automatic parking management makes the access and management of parking spaces easy, modern and profitable.

For car park users, the Arivo Smart Parking solution offers a convenient driveway with reliable and fast license plate recognition as well as transparent and simple self-management and payment. This enables car park bookings and reservations with just one click.

This means for the parking operator that a modern, maintenance-free system with low installation costs, a reduction of the administration costs, unproblematic integration with existing systems as such as the control over the actual use and capacity is in use. This enables both occupancy rates and letting turnover to be planned and optimised in the best possible way.

YOUR REQUIREMENTS

- ⊙ **Maximize** utilization, revenue, and profit
- ⊙ **Reliable** and fast license plate recognition
- ⊙ **Integration possibility** for existing systems
- ⊙ **Minimize administrative costs**
- ⊙ **Payment with an attractive booking system** for customers - no annoying ticket purchase
- ⊙ Scalable solution **already profitable for small garages**, but also suitable for **highly complex requirements**, which makes it fit for the future
- ⊙ **Maintenance free**
- ⊙ Modern **innovative access system**

THE ARIVO ADVANTAGES

- ✓ **Everything from a single source** - from the rental platform with automatic billing to a barrier system
- ✓ **Increased utilization** and profit through connection to short-term parking apps such as A1 mobile phone parking with over 1.4 million users
- ✓ **Cost-optimized solution** without cash machine, tickets, etc.
- ✓ Completely **automated administration** including billing and dunning saves administrative effort and costs.
- ✓ Simple control and **location-independent administration** via a web interface

- ✓ No additional physical media (card, key, RFID tag, ...) is necessary
- ✓ Unregistered customers can make **cashless payments** on site by credit card and ATM card
- ✓ **Easy integration of backup media** - entry and exit also possible with QR code
- ✓ No moving parts make the parking system completely maintenance-free
- ✓ **Additional income** possible by setting up **electric charging stations** in the garage
- ✓ Billing is carried out together with the parking process
- ✓ **Industry Best License Plate Recognition**
- ✓ The SaaS solution includes an **all-in-one package** with all updates

CLIENT TESTIMONIALS

A smart solution for a complex system

"The car park operator works with Arivo's solution with a modern, maintenance-free system, has low installation costs due to the elimination of moving parts, and can reduce its administrative costs. The Absolute control over actual usage and capacity makes it possible to plan and optimise occupancy and rental revenue in the best possible way. The innovative system relieves the operator of administrative work, allowing him to concentrate fully on the preparation of customer-specific quotations and marketing".

Dr. Wolfgang Reichl
General Manager at ParkenPlus Betreiber GmbH

SIMPLE INSTALLATION

Our digital parking system is the ideal solution for garage operators and garage owners to reduce costs in administration and to optimize utilization, turnover and profit.

The technologically leading solution is based on a few basic elements that can be combined as if its required. The installation is **simple**, and the system is **maintenance free**

HARDWARE

The components camera, parking column and control PC are purchased once and form the hardware basis for license plate recognition.

Camera	Parking Pillar
<ul style="list-style-type: none">✓ Industry leading product	<ul style="list-style-type: none">✓ QR-code reader and card reader as a backup
<ul style="list-style-type: none">✓ Reads license plate within 50ms	<ul style="list-style-type: none">✓ Intercom system for emergency calls
<ul style="list-style-type: none">✓ No external triggering necessary	<ul style="list-style-type: none">✓ Display for information
<ul style="list-style-type: none">✓ Detection rate > 99% in live test	<ul style="list-style-type: none">✓ On-site payment function with ATM and credit card (NFC)
<ul style="list-style-type: none">✓ All European countries supported	<ul style="list-style-type: none">✓ Digital receipt
<ul style="list-style-type: none">✓ Easy installation and wiring	<ul style="list-style-type: none">✓ No moving parts and consumables
<ul style="list-style-type: none">✓ Maintenance-free	<ul style="list-style-type: none">✓ Fully-adequate parking system

ARIVO SMART PARKING SOFTWARE

Our software solution is a full-service package in two versions, which can also be used in combination. Therefore, there are **no unforeseen additional costs for updates, product cancellations or support.**

The **parking management system** enables the management of all parking spaces from anywhere and at any time, thus saving administration costs and resources.

If you want to successfully monetize the use of parking space, our Arivo **Online Parking Platform** is the ideal solution. Administration, reservation, rental and billing are automated and thus easier than ever.

Your additional advantage: There are **no extra set-up costs** and **no risk.**

Parking Management System	Online Parking Platform
<ul style="list-style-type: none">✓ Manage parking authorizations & license plates online✓ Statistics and live Dashboard✓ Guest invitations✓ Multi-client capable✓ anti-pass back✓ Flexible zone settings✓ Multifunctional software for simple and highly complex requirements	<ul style="list-style-type: none">✓ Parking spaces for long-term parkers and short-term parkers✓ Reservation✓ Simple automated billing and dunning process✓ Maximizing returns✓ Connection to short park apps✓ Payment via web application and QR Codes possible
<ul style="list-style-type: none">✓ cost optimisation✓ utilisation optimisation✓ Overwatch control centre for overview and manual intervention✓ Statistics dashboard	

FLEXIBLE, TRANSPARENT, MAINTENANCE-FREE AND SAFE

The web-based system is not only **modern** and **fit for the future**, but also **profitable** even for small garages and parking areas. The fully-fledged digital parking management solution is scalable.

With our system, you can map even the most complex requirements and processes, from simple car park management to profit-optimised car park management. Nevertheless, it remains **simple** and **smart** to use for the user. Whether a housing company, a garage operator or a company, the digital parking system offers an optimal solution with clear cost advantages for every requirement.

ABOUT ARIVO AS A PROJECT PARTNER

Arivo is your reliable partner for innovative parking management. We completed over 40 projects. Arivo has packages for every customer requirement.

We offer a digital parking management system with state-of-the-art license plate recognition and a fully automated rental platform. According to our current customer survey, 92% are very satisfied with our project performance and even 96% would recommend us. In addition to the high reliability and speed of our license plate recognition rate and the innovation of the product, our excellent, fair price-performance ratio was particularly emphasized in the customer feedback.

We are happy to support you!
